## **Richard T LaBorde, Designer/Draftsman**

*Lead Designer /Draftsman*

---

### **Overview**

Borrel Engineering, LLC (BE) utilizes the latest design software for the accurate design of all projects to reduce design time and achieve accurate, clean & quality construction drawings & documents.

BE's professional designers & draftsman are also responsible for accurate drawings while working with other draftsman to achieve one main goal. Designers and draftsman are responsible for working directly with clientele to trouble shoot any issues that may arise.

### **SPECIFIC EXPERIENCE**

Mr. LaBorde has over 20 years of Design and Drafting experience. His background includes Lead Designer/Drafter on multiple projects for the City of Marksville, Louisiana, Alexandria Housing Authority (HUD), North Little Rock Housing Authority, Arkansas, Bogalusa Housing Authority, Louisiana and Avoyelles Parish Water Commission. His work in private industries includes Civil, and Structural, Engineering. Mr. LaBorde also has experience in the Oil & Gas industry, with the design of multiple production platforms over the past 15 years.

Mr. LaBorde's Civil experience includes water line projects for the City of Marksville, building structural design, foundation design and parking area designs that include storm water drainage for multiple buildings for Fresenius Kidney Care. Other projects include Rapides Regional Medical Center helipad and parking garage repairs. Mr. Laborde is currently working on the redesign of North Little Rock Housing Authority parking lots, new streets, storm water drainages, & utilities. Mr. Laborde is also currently in the process of designing building foundations, new streets, parking areas and drainage for Bogalusa Housing Authority. Several projects for The Louisiana National Guard which includes wash racks & personnel bridges and sidewalks. Mr. LaBorde's oil & gas experience includes multiple designs of offshore production platforms in the Gulf of Mexico and international waters. Other designs include production decks, boat landings, helideck platforms, production skids access decks, Ladders and Stair Systems associated with these Platforms. Mr. Laborde uses OSHA Requirements & ADA Requirements for the design of the above-mentioned projects.
